

VERTICAL ACCESS AID

Increases working height and productivity

Bailey's VAA maximizes reach and productivity by providing operators with safe, increased access into and around tight, restricted spaces, such as ceiling openings and ceiling mounted structures.

- Improves accessibility in restricted areas
- Increases fleet flexibility
- Full height platform rails provide operator security
- One person installation process and no special tools or lifting equipment required
- The lift can be operated from the elevated platform
- Available on Skyjack scissor lift
- Call for other models
